This didactic and hands-on program is open to all spine surgeons who are interested in learning the lateral approach to the lumbar spine using the Pioneer Surgical Cross-Fuse II Lateral Fusion System. This course will also feature the ability to create a rigid construct in the thoracolumbar spine via a percutaneous or mini-open approach using the recently launched Streamline MIS Spinal Fixation System.

August 17, 2013 | 8:00am - 3:00pm
